

MAKI Search Filter Reference

All filters work in **maki search**, the web UI search box, and saved searches. Filters combine with **AND**. Free-text tokens search names, filenames, descriptions, and metadata.

Filter	Syntax	Example
Asset type	<code>type:<type></code>	<code>type:image, type:video</code>
Tag	<code>tag:<name></code>	<code>tag:landscape, tag:"Fools Theater"</code>
Tag whole path	<code>tag:=<name></code>	<code>tag:=Legoland</code> (exact value, not leaves elsewhere)
Tag leaf only	<code>tag:/<name></code>	<code>tag:/animal bird</code> (no descendants)
Tag case-sensitive	<code>tag:~<name></code>	<code>tag:~Landscape</code> (not "landscape")
Tag prefix anchor	<code>tag: <text></code>	<code>tag: wed</code> (wedding, wedding-2024, ...)
Exclude tag	<code>-tag:<name></code>	<code>-tag:rejected</code>
Format	<code>format:<ext></code>	<code>format:nef, format:jpg</code>
Rating	<code>rating:<N>, <N>+, <N>-<M>, <N>,<M></code>	<code>rating:4+, rating:3-5, rating:0</code> (un-rated)
Color label	<code>label:<color>, label:none</code>	<code>label:Red, label:none</code>
Camera	<code>camera:<text></code>	<code>camera:fuji, camera:"Canon EOS R5"</code>
Lens	<code>lens:<text></code>	<code>lens:56mm, lens:"RF 50mm"</code>
Description	<code>description:<text>, desc:<text></code>	<code>description:sunset</code>
ISO	<code>iso:<N>, iso:<min>-<max></code>	<code>iso:100, iso:100-800</code>
Focal length	<code>focal:<N>, focal:<min>-<max></code>	<code>focal:50, focal:35-70</code>
Aperture	<code>f:<N>, f:<min>-<max></code>	<code>f:2.8, f:1.4-2.8</code>
Width / Height	<code>width:<N>, <N>+, <min>-<max></code>	<code>width:4000+, height:2160</code>
Source metadata	<code>meta:<key>=<value></code>	<code>meta:software=CaptureOne</code>
Path pattern	<code>path:<pattern> (*=wild)</code>	<code>path:*/2026/*/party</code>
Collection	<code>collection:<name></code>	<code>collection:Favorites</code>
Date	<code>date:<prefix></code>	<code>date:2026, date:2026-02</code>
Date from / until	<code>dateFrom:<date>, dateUntil:<date></code>	<code>dateFrom:2026-01-01</code>
Volume	<code>volume:<label></code>	<code>volume:Archive, volume:none</code>
Asset ID	<code>id:<prefix></code>	<code>id:72a0bb4b</code>
Copies	<code>copies:<N>, copies:<N>+</code>	<code>copies:1, copies:2+</code>
Variants	<code>variants:<N>+</code>	<code>variants:2+</code>
Tag count (leaves)	<code>tagcount:<N>, tagcount:<N>+, tagcount:<A>-</code>	<code>tagcount:0, tagcount:5+</code>
Scattered	<code>scattered:<N>, scattered:<N>+</code>	<code>scattered:2+</code> (2+ session roots)
Duration (seconds)	<code>duration:<N>, duration:<N>+, duration:<min>-<max></code>	<code>duration:60, duration:30+</code>
Codec	<code>codec:<text></code>	<code>codec:h264, codec:hevc</code>
Musical key / BPM	<code>key:<key>, bpm:<N>, <min>-<max></code>	<code>key:Am, bpm:100-140</code>
GPS box / radius	<code>geo:<S>,<W>,<N>,<E>, geo:<lat>,<lng>,<km></code>	<code>geo:52.52,13.405,5</code>
GPS any/none	<code>geo:any, geo:none</code>	<code>geo:any</code>
Orphan	<code>orphan:true</code>	<code>orphan:true</code>
Missing files	<code>missing:true</code>	<code>missing:true</code>
Stale verification	<code>stale:<days></code>	<code>stale:30</code>
Stacked	<code>stacked:true, stacked:false</code>	<code>stacked:true</code>
Face count	<code>faces:any, faces:none, faces:<N>+</code>	<code>faces:2+</code>
Person [Pro]	<code>person:<name></code>	<code>person:Alice,Bob</code> (comma = either; repeat = both)
Visual similarity [Pro]	<code>similar:<id>, similar:<id>:<limit></code>	<code>similar:72a0bb4b:50</code> (default 40)
Query image [Pro]	<code>maki search --image <file></code>	<code>--image preview.jpg</code> (find the original)
Similarity threshold [Pro]	<code>min_sim:<percent></code>	<code>min_sim:90</code> (similar, text, -image)
Text search [Pro]	<code>text:<query>, text:"<q>":<limit></code>	<code>text:"sunset beach"</code> (quote multi-word)
Embedding status	<code>embed:any, embed:none</code>	<code>embed:none type:image</code>

All numeric filters support: exact (3), minimum (3+), range (3-5), OR (2,4).

MAKI Search Filter Reference

Combining Filters

AND	Repeat tag: (or meta:) to require all values; repeating other filters ORs them tag:landscape tag:sunset
OR	Comma within a single filter tag:alice,bob format:nef,cr3
NOT	Dash prefix excludes (tag, type, format, label, volume, camera, lens, description, path, collection, person, free text) -tag:rejected -format:xmp
Combined	type:image,video -tag:rejected rating:3+

Hierarchical tags: **tag:bird** matches at any level — **animal|bird**, **animal|bird|eagle**, and standalone **bird**.
Markers: = whole path, / leaf only, ^ case-sensitive, | prefix anchor.

Sort Options

date_desc	Newest first (<i>default</i>)
date_asc	Oldest first
name_asc	Name A→Z
name_desc	Name Z→A
size_desc	Largest first
size_asc	Smallest first
similarity_desc	Most similar first [Pro] (default for similar: / --image)
similarity_asc	Least similar first [Pro]

Web UI and saved searches: **maki saved-search save NAME QUERY --sort name_asc**. **maki search** has no **--sort**: newest first, or by score for similarity searches.

Output Formats

<i>(default)</i>	ID, name (or filename), type, format, date
--format ids / -q	One UUID per line (scripting)
--format full	Default + tags, description
--format json	JSON array
--format '{...}'	Custom template

Placeholders: {id}, {short_id}, {name}, {filename}, {type}, {format}, {date}, {tags}, {description}, {hash}, {label}, {similarity}, {exact} [\[Pro\]](#)

Path Normalization

The **path:** filter auto-normalizes in the CLI:

~	Expands to home directory
./ ../	Resolves relative to cwd
/Volumes/...	Strips volume mount, applies volume:

Common Recipes

rating:4+ type:image
Best images

date:2026-03 tag:landscape
March landscapes

format:nef -tag:processed
Unprocessed RAWs

copies:1 volume:Photos
Single-copy files (backup candidates)

stale:90
Not verified in 90 days

orphan:true
Assets with no file locations

faces:any person:Alice rating:4+
Alice's best shots

similar:72a0bb4b rating:3+ min_sim:80 [\[Pro\]](#)
Visually similar, curated

text:"sunset on the beach" [\[Pro\]](#)
Semantic image search

--image preview.jpg "min_sim:90" [\[Pro\]](#)
Find the original of a local file
