MAKI Search Filter Reference

All filters work in `maki search`, the web UI search box, and saved searches. Filters combine with **AND**. Free-text tokens search names, filenames, descriptions, and metadata.

Filter	Syntax	Example
Asset type	`type:<type>`	`type:image`, `type:video`
Tag	`tag:<name>`	`tag:landscape`, `tag:"Fools Theater"`
Tag whole path	`tag:=<name>`	`tag:=Legoland` (exact value, not leaves elsewhere)
Tag leaf only	`tag:/<name>`	`tag:/animal|bird` (no descendants)
Tag case-sensitive	`tag:^<name>`	`tag:^Landscape` (not "landscape")
Tag prefix anchor	`tag:|<text>`	`tag:|wed` (wedding, wedding-2024, ...)
Exclude tag	`-tag:<name>`	`-tag:rejected`
Format	`format:<ext>`	`format:nef`, `format:jpg`
Rating	`rating:<N>`, `<N>+`, `<N>-<M>`, `<N>,<M>`	`rating:4+`, `rating:3-5`, `rating:0` (unrated)
Color label	`label:<color>`, `label:none`	`label:Red`, `label:none`
Camera	`camera:<text>`	`camera:fuji`, `camera:"Canon EOS R5"`
Lens	`lens:<text>`	`lens:56mm`, `lens:"RF 50mm"`
Description	`description:<text>`, `desc:<text>`	`description:sunset`
ISO	`iso:<N>`, `iso:<min>-<max>`	`iso:100`, `iso:100-800`
Focal length	`focal:<N>`, `focal:<min>-<max>`	`focal:50`, `focal:35-70`
Aperture	`f:<N>`, `f:<min>-<max>`	`f:2.8`, `f:1.4-2.8`
Width / Height	`width:<N>`, `<N>+`, `<min>-<max>`	`width:4000+`, `height:2160`
Source metadata	`meta:<key>=<value>`	`meta:software=CaptureOne`
Path pattern	`path:<pattern>` (*=wild)	`path:*/2026/*/party`
Collection	`collection:<name>`	`collection:Favorites`
Date	`date:<prefix>`	`date:2026`, `date:2026-02`
Date from / until	`dateFrom:<date>`, `dateUntil:<date>`	`dateFrom:2026-01-01`
Volume	`volume:<label>`	`volume:Archive`, `volume:none`
Asset ID	`id:<prefix>`	`id:72a0bb4b`
Copies	`copies:<N>`, `copies:<N>+`	`copies:1`, `copies:2+`
Variants	`variants:<N>+`	`variants:2+`
Tag count (leaves)	`tagcount:<N>`, `tagcount:<N>+`, `tagcount:<A>-<B>`	`tagcount:0`, `tagcount:5+`
Scattered	`scattered:<N>`, `scattered:<N>+`	`scattered:2+` (2+ session roots)
Duration (seconds)	`duration:<N>`, `duration:<N>+`, `duration:<min>-<max>`	`duration:60`, `duration:30+`
Codec	`codec:<text>`	`codec:h264`, `codec:hevc`
Musical key / BPM	`key:<key>`, `bpm:<N>`, `<min>-<max>`	`key:Am`, `bpm:100-140`
GPS box / radius	`geo:<S>,<W>,<N>,<E>`, `geo:<lat>,<lng>,<km>`	`geo:52.52,13.405,5`
GPS any/none	`geo:any`, `geo:none`	`geo:any`
Orphan	`orphan:true`	`orphan:true`
Missing files	`missing:true`	`missing:true`
Stale verification	`stale:<days>`	`stale:30`
Stacked	`stacked:true`, `stacked:false`	`stacked:true`
Face count	`faces:any`, `faces:none`, `faces:<N>+`	`faces:2+`
Person [Pro]	`person:<name>`	`person:Alice,Bob` (comma = either; repeat = both)
Visual similarity [Pro]	`similar:<id>`, `similar:<id>:<limit>`	`similar:72a0bb4b:50` (default 40)
Query image [Pro]	`maki search --image <file>`	`--image preview.jpg` (find the original)
Similarity threshold [Pro]	`min_sim:<percent>`	`min_sim:90` (similar, text, –image)
Text search [Pro]	`text:<query>`, `text:"<q>":<limit>`	`text:"sunset beach"` (quote multi-word)
Embedding status	`embed:any`, `embed:none`	`embed:none type:image`

All numeric filters support: exact (`3`), minimum (`3+`), range (`3-5`), OR (`2,4`).

MAKI Search Filter Reference

Combining Filters

AND Repeat `tag:` (or `meta:`) to require all values; repeating other filters ORs them

```
tag:landscape tag:sunset
```

OR Comma within a single filter

```
tag:alice,bob   format:nef,cr3
```

NOT Dash prefix excludes (tag, type, format, label, volume, camera, lens, description, path, collection, person, free text)

```
-tag:rejected   -format:xmp
```

Combined

```
type:image,video -tag:rejected rating:3+
```

Hierarchical tags: `tag:bird` matches at any level — `animal|bird`, `animal|bird|eagle`, and standalone `bird`. Markers: `=` whole path, `/` leaf only, `^` case-sensitive, `|` prefix anchor.

Sort Options

`date_desc`	Newest first *(default)*
`date_asc`	Oldest first
`name_asc`	Name A→Z
`name_desc`	Name Z→A
`size_desc`	Largest first
`size_asc`	Smallest first
`similarity_desc`	Most similar first [Pro] (default for `similar:` / `--image`)
`similarity_asc`	Least similar first [Pro]

Web UI and saved searches: `maki saved-search save NAME QUERY --sort name_asc`. `maki search` has no `--sort`: newest first, or by score for similarity searches.

Output Formats

(default)	ID, name (or filename), type, format, date
`--format ids` / `-q`	One UUID per line (scripting)
`--format full`	Default + tags, description
`--format json`	JSON array
`--format '{..}'`	Custom template

Placeholders: `{id}`, `{short_id}`, `{name}`, `{filename}`, `{type}`, `{format}`, `{date}`, `{tags}`, `{description}`, `{hash}`, `{label}`, `{similarity}`, `{exact}` [Pro]

Path Normalization

The `path:` filter auto-normalizes in the CLI:

`~`	Expands to home directory
`./` `../`	Resolves relative to cwd
`/Volumes/...`	Strips volume mount, applies `volume:`

Common Recipes

```
rating:4+ type:image
```
Best images

```
date:2026-03 tag:landscape
```
March landscapes

```
format:nef -tag:processed
```
Unprocessed RAWs

```
copies:1 volume:Photos
```
Single-copy files (backup candidates)

```
stale:90
```
Not verified in 90 days

```
orphan:true
```
Assets with no file locations

```
faces:any person:Alice rating:4+
```
Alice's best shots

```
similar:72a0bb4b rating:3+ min_sim:80
```
[Pro] Visually similar, curated

```
text:"sunset on the beach"
```
[Pro] Semantic image search

```
--image preview.jpg "min_sim:90"
```
[Pro] Find the original of a local file
