

MAKI Search Filter Reference

All filters work in **maki search**, the web UI search box, and saved searches. Filters combine with **AND**. Free-text tokens search names, filenames, descriptions, and metadata.

Filter	Syntax	Example
Asset type	type:<type>	type:image, type:video
Tag	tag:<name>	tag:landscape, tag:"Fools Theater"
Tag whole path	tag:=<name>	tag:=Legoland (exact value, not leaves elsewhere)
Tag leaf only	tag:/<name>	tag:/animal bird (no descendants)
Tag case-sensitive	tag:~<name>	tag:~Landscape (not "landscape")
Tag prefix anchor	tag: <text>	tag: wed (wedding, wedding-2024, ...)
Exclude tag	-tag:<name>	-tag:rejected
Format	format:<ext>	format:nef, format:jpg
Rating	rating:<N>, <N>+, <N>-<M>, <N>,<M>	rating:4+, rating:3-5, rating:0 (un-rated)
Color label	label:<color>, label:none	label:Red, label:none
Camera	camera:<text>	camera:fuji, camera:"Canon EOS R5"
Lens	lens:<text>	lens:56mm, lens:"RF 50mm"
Description	description:<text>, desc:<text>	description:sunset
ISO	iso:<N>, iso:<min>-<max>	iso:100, iso:100-800
Focal length	focal:<N>, focal:<min>-<max>	focal:50, focal:35-70
Aperture	f:<N>, f:<min>-<max>	f:2.8, f:1.4-2.8
Width / Height	width:<N>+, height:<N>+	width:4000+, height:2000+
Source metadata	meta:<key>=<value>	meta:software=CaptureOne
Path pattern	path:<pattern> (*=wild)	path:*/2026/*/party
Collection	collection:<name>	collection:Favorites
Date	date:<prefix>	date:2026, date:2026-02
Date from / until	dateFrom:<date>, dateUntil:<date>	dateFrom:2026-01-01
Volume	volume:<label>	volume:Archive, volume:none
Asset ID	id:<prefix>	id:72a0bb4b
Copies	copies:<N>, copies:<N>+	copies:1, copies:2+
Variants	variants:<N>+	variants:2+
Tag count (leaves)	tagcount:<N>, tagcount:<N>+, tagcount:<A>-	tagcount:0, tagcount:5+
Scattered	scattered:<N>+, scattered:<N>+/<depth>	scattered:2+/1
Duration (seconds)	duration:<N>, duration:<N>+, duration:<min>-<max>	duration:60, duration:30+
Codec	codec:<text>	codec:h264, codec:hevc
GPS location	geo:<S>,<W>,<N>,<E>	geo:47.5,11.0,48.5,13.0
GPS any/none	geo:any, geo:none	geo:any
Orphan	orphan:true	orphan:true
Missing files	missing:true	missing:true
Stale verification	stale:<days>	stale:30
Stacked	stacked:true, stacked:false	stacked:true
Face count [Pro]	faces:any, faces:none, faces:<N>+	faces:2+
Person [Pro]	person:<name>	person:Alice (repeat for AND, comma for OR)
Visual similarity [Pro]	similar:<id>, similar:<id>:<limit>	similar:72a0bb4b:50
Similarity threshold [Pro]	min_sim:<percent>	min_sim:90
Text search [Pro]	text:<query>	text:"sunset beach"
Embedding status [Pro]	embed:any, embed:none	embed:none type:image

All numeric filters support: exact (3), minimum (3+), range (3-5), OR (2,4).

MAKI Search Filter Reference

Combining Filters

AND	Repeat a filter to require all values <code>tag:landscape tag:sunset</code>
OR	Comma within a single filter <code>tag:alice,bob format:nef,cr3</code>
NOT	Dash prefix excludes matches <code>-tag:rejected -format:xmp</code>
Combined	<code>type:image,video -tag:rejected rating:3+</code>

Hierarchical tags: `tag:bird` matches at any level — `animal|bird`, `animal|bird|eagle`, and standalone `bird`.

Sort Options

<code>date_desc</code>	Newest first (<i>default</i>)
<code>date_asc</code>	Oldest first
<code>name_asc</code>	Name A→Z
<code>name_desc</code>	Name Z→A
<code>size_desc</code>	Largest first
<code>size_asc</code>	Smallest first
<code>similarity_desc</code>	Most similar first [Pro]
<code>similarity_asc</code>	Least similar first [Pro]

Usage: `maki search "rating:4+" --sort name_asc`

Output Formats

<i>(default)</i>	ID, filename, type, format, date
<code>--format ids / -q</code>	One UUID per line (scripting)
<code>--format full</code>	Default + tags, description
<code>--format json</code>	JSON array
<code>--format '{..}'</code>	Custom template

Placeholders: `{id}`, `{name}`, `{filename}`, `{type}`, `{format}`, `{tags}`, `{description}`, `{rating}`, `{label}`, `{date}`, `{size}`

Path Normalization

The <code>path:</code> filter	auto-normalizes in the CLI:
<code>~</code>	Expands to home directory
<code>./ ../</code>	Resolves relative to cwd
<code>/Volumes/...</code>	Strips volume mount, applies <code>volume:</code>

Common Recipes

`rating:4+ type:image`
Best images

`date:2026-03 tag:landscape`
March landscapes

`format:nef -tag:processed`
Unprocessed RAWs

`copies:1 volume:Photos`
Single-copy files (backup candidates)

`stale:90`
Not verified in 90 days

`orphan:true`
Assets with no file locations

`faces:any person:Alice rating:4+`
Alice's best shots

`similar:72a0bb4b rating:3+ min_sim:80` [\[Pro\]](#)
Visually similar, curated

`text:"sunset on the beach" min_sim:70` [\[Pro\]](#)
Semantic image search
